DETAILED ACTION

Election/Restrictions

Claims 15-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected process of procedure claims, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-7 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by Ikeda (4,476,595). Ikeda discloses the use of a mattress comprising a frame (26), a substantially uniplaner, non-woven grid (30) integrally formed with a pair of attachment strips (22); and a plurality of fasteners attaching the uniplaner non-woven grid to the frame through the attachment strips. In regards to claim 3, the substantially uniplaner, non-woven grid comprises closely spaced primary members and points of intersection the closely spaced primary members being connected by said points of intersection. In regards to claim 4, the points of intersection are in line between the attachment strips, thereby forming a plurality of ribs substantially perpendicular to the closely spaced primary members. In regards to claim 5, points of intersection are located at said attachment strips. In regards to claim 6, the attachment

strips are comprised of a pre-stretch grid section. In regard to claim 7, each of the attachment strips has a wire (14) embedded therein.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 10-14 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda in view of Linder (5,582,463). Ikeda discloses a suspension article comprising a frame, non-woven grid, and a plurality of fasteners. Ikeda shows all the teachings of the claimed invention but fails to show the use of J-strip fasteners. Linder teaches the use of J-strip fasteners attached to a frame. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the suspension article of Ikeda with the J-strip fasteners as taught by Linder, in order to support the occupant better.

Allowable Subject Matter

Claims 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

R s p o n s t o A r g u m n t s

Applicant's arguments filed November 15,2002 have been fully considered but they are not persuasive.

In regards to claims 15-20, are still drawn to a process of producing a suspension article is not germane to the issue of patentability of the device itself. The process of producing the limitation has not been given any patentable weight in the article claims. Therefore, the restriction is made final.
